

Outdoor Banner Wall - Quick Instructions

Step 1

Fill your water base with water the insert the water base cap on both water bases

Step 2

Un-Screw the pole support shield on the water base and connect the base with the 2 Water Base Support poles. Make sure you place the poles into the grooves until it sits snugged. Hook the larger size springs to the front of the water base for the dowel. Replace the pole support shield. Repeat on both sides

Step 3

Grab the Main extendable stand poles and slide the Screw caps to the bottom of the main pole and slide the pole into the water base cap and screw it tight to hold the main pole in place. Repeat on both water bases

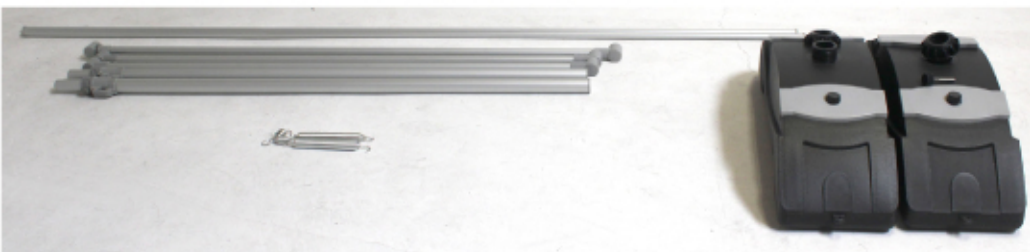

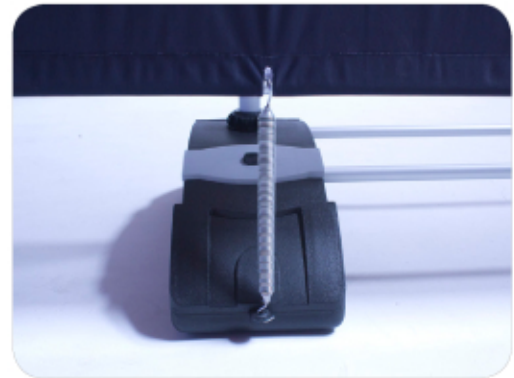

Step 4

Connect the top pole to the main poles to hold them together. You will notice and metal ring on the top pole, those are use to hook the smaller springs to. Move the silver rings to both ends of the pole and hook a small spring on both sides

Step 5

Insert the dowels into the polepocket on the top and bottom of the graphic. There are spring hooks on the top and bottom of your graphic. Connect the springs to the graphic and using the adjustable stand poles, raise your graphic until tension is tight.
